SUMMARY

AI-native with 5+ years of overall experience, building at the intersection of product thinking, Agentic AI, and operational execution. At NxtWave Tech — architected the Agentic AI pipeline cutting production time by 87.5%; and scaled team from 0 to 20 (peak) while leading growth of core assessment library 23×. Thrives in early-stage environments where the brief is ambiguous, the team is lean, and someone needs to simultaneously hold the roadmap, talk to engineers, and ship.

PROFESSIONAL EXPERIENCE

Senior Project Manager — NxtWave Technologies (Series A, \$33M)

Mar 2026 – Present

Reporting directly to Co-founder

Project Manager — NxtWave Technologies (Series A, \$33M)

Jan 2023 – Feb 2026

Reporting directly to Vice-President

- Worked on SaaS B2B platform called 'top-in-tech' (<https://topin.tech>); led the growth of technical assessment content library by 23× — from an initial base to 70,000+ units — and expanded question-variant types from 3 to 9.
- Partnered with the product engineering team to translate operational pain points into actionable feature briefs — shipped 10+ features into production.
- Managed the full program across 5 service lines — owning intake, prioritisation, go-live scheduling, and stakeholder sign-off.
- Operated across multiple teams — Corporate Relations, Product Engineering, Curriculum and Operations teams.
- Designed AI production pipeline for technical content — reduced production time by 87.5%.
- Directed ideation and rollout of 23+ internal automation tools — reduced per-unit production cost by ~80% and scaled annual output by over 5× in a single fiscal year.
- Built the content team from 0 to 12 (peak 20) across 6 technical domains — owned hiring end-to-end — onboarding to production independence, and upskilled every team member into AI-native workflows.

Systems Engineer — Infosys Limited

Sep 2018 – Sep 2020

- Completed Infosys' intensive 6-month Java development training at Mysore — built hands-on proficiency in Core Java, OOP, and Spring Boot through structured coursework and live coding assessments.
- Contributed to two separate client projects as part of Agile/Scrum teams — participated in sprint planning, worked assigned story points, and completed feature delivery tasks within sprint cadences.
- Authored knowledge-transfer documentation for 15+ modules, cutting new-joiner onboarding time by ~30% and establishing the documentation standard adopted across the project.

Skills

Python · SQL · REST APIs · AWS S3 · Git · Prompt Engineering · RAG pipelines · LangChain · Harness engineering · Roadmap & lifecycle ownership · Backlog prioritisation · KPI & unit-economics design · Stakeholder requirement translation · Cross-functional consensus building · Agile/Scrum delivery · Team building & performance management

BREAK

Took a career break to prepare for UPSC CSE 2022; also cleared ICET with a rank of 349.

Sep 2020 – Dec 2022

EDUCATION

B.Tech, Mechanical Engineering — MVGR College of Engineering · First Class with Distinction

2014 – 2018
