

VENKATA MANOJ KUMAR

Program Manager | Product Operations | AI-Powered Delivery

Hyderabad, India • itsvenkatamanojkumar@gmail.com • <https://www.linkedin.com/in/dvmk97> • +91 88854 74119

SUMMARY

Project Manager with more than 5 years of experience owning end-to-end delivery on a multi-client SaaS platform. Comfortable operating from executive strategy to ground-level execution — translating ambiguous requirements into roadmaps, building teams from zero, and integrating GenAI to compress cost and turnaround. CAT 85th percentile (QA) · ICET top 1% state-wide.

PROFESSIONAL EXPERIENCE

Project Manager — NxtWave Technologies (Series A, \$33M; B2B SaaS assessment platform) Jan 2023 – Present
Reporting to VP / Co-founder

- Operate as Program Manager and Product Operations Lead across 5 service lines — owning the rolling roadmap, backlog, stakeholder intake, and go-live verification for more than 17 enterprise accounts.
- Built the team from zero to 12 (peak 20) of fresh graduates across 6 technical domains — owned hiring end-to-end and trained every new hire to operational independence before considering them onboarded.
- Set weekly goals, ran performance reviews, and enforced attendance and policy adherence personally — delivering individual performance inputs that directly shaped compensation decisions reviewed by the VP.
- Single point of contact for more than 3 internal teams — translated ambiguous, client-specific requirements into delivery specs while managing live issue escalation directly with the engineering team.
- Shaped 4 new platform features development by representing the operations voice in scope reviews — ran version-tracked feedback loops across dev iterations and eliminated rework on rollouts.
- Built the team's unit-economics framework from scratch — defined cost-per-unit and per-contributor productivity KPIs that became the basis for performance discussion, headcount, and process decisions.
- Cut per-unit production cost by ~80% through GenAI integration and process redesign — while scaling annual output to 24,000+ units delivered in a single fiscal year.
- Architected and shipped an AgenticAI production pipeline end-to-end — cut content production time by 87.5% on the workflows it covered.
- Directed ideation and rollout of 23+ internal automation tools targeting specific operational bottlenecks — guided team members through implementation hands-on, including those without prior production engineering exposure.

Systems Engineer — Infosys Limited Sep 2018 – Sep 2020
Enterprise software delivery, Agile/Scrum team.

- Delivered features on a Spring Boot microservices project end-to-end — full Git / PR / code review workflow with zero critical production defects across all delivery phases.
- Authored knowledge-transfer documentation for 15+ modules — cut new-joiner onboarding time by ~30% and set the documentation standard for the project.

ANALYTICAL DEVELOPMENT PERIOD

Self-directed study & competitive examinations Sep 2020 – Dec 2022
• CAT 2020: Quantitative Ability — 85th percentile nationally · ICET 2020: Rank 349 of ~40,000 (top 1%) · APPSC Group I Prelims: cleared.

TECHNICAL TOOLKIT & COMPETENCIES

Program & Product Management: Roadmap & lifecycle ownership · Backlog prioritization · KPI & unit-economics design · Stakeholder requirement translation · Agile/Scrum delivery · Cross-functional team leadership · Vendor & partner coordination · Executive reporting.

AI & Automation: OpenAI API integration · Prompt engineering · Agentic workflow design · LLM-based QA and content generation · Google Apps Script automation · Selenium-based browser automation.

Technical Stack (working familiarity, used to validate delivery and ship internal tools): Python · SQL · REST APIs · AWS S3 · JSON/CSV pipelines · Git · HTML/CSS/JavaScript (review-level) · Spring Boot & microservices basics (from Infosys).

Analytics & Reporting: Performance data analysis · Cost-per-unit modeling · KPI dashboards · Content effectiveness tracking.

EDUCATION

B.Tech, Mechanical Engineering — MVGR College of Engineering · First Class with Distinction 2014 – 2018
